Proclamation

By the Governor of the Territory of Oregon.

In pursuance of the Act of Congress, approved August 14th in the year of our Lord one thousand eight hundred and forty eight, to establish the Territorial Government of Oregon.

I, Joseph Lane, Governor of the Territory of Oregon, do hereby declare and make known, that an election will be held on the first Monday in June next (1849) at the several places appointed by authority of the laws of the late provisional Government of the Territory, for the purpose of electing one delegate to the Congress of the United States.

And, at the same time and places, for the election of members of the Council and House of Representatives of the Legislature of said Territory, and that the several Counties as laid off by the laws of the late provisional Government of said Territory, are entitled to and shall elect the following number of Members to the Council, to wit:- * (insert here)

The Counties of Clatsop, Lewis and Vancouver, one ~~member of the Council~~ Representative, the Counties of Twality, ~~Yamhill~~, Polk, Benton and Linn, two Representatives, each, and the Counties of Yamhill, Champoeg and Clackamas three Representatives each.

In case there should be no Judges of election appointed under the Territorial law now in force, or if there be no Judges present at the

place of voting, then the voters present shall elect their Judges, and the Judges shall appoint clerks. Both Judges and Clerks before entering upon the discharge of their duties, shall take an oath to support the Constitution of the United States & the laws of Congress "to establish the Territorial Government of Oregon" and faithfully to discharge their duties as Judges and clerks of the election.

Given under my hand at Oregon City, Oregon Territory April 2nd 1849.

The following Instructions were issued to Capt Saml Gilmore to wit:-

Oregon City
April 9 1849

To Capt Saml Gilmore

Sir,

I have this day Commissioned you Captain of the Tillamook Company of Volunteers, to take effect on the first day of May next, at which time you will make out and forward to the Executive a Muster roll of your Company as provided by law. You will also make out quarterly returns shewing the strength and condition of your Company, the number and condition of the Arms and accoutrements, the quantity of ammunition on hand, and the condition of the same, and cause the returns to be forwarded

The Executive Office.

As I am informed it is the intention of yourself and Company to form a settlement in the Southern portion of this Territory, on or near the road leading from the settlements in Oregon to the Gold mines, you will as far as it will in your power afford protection to our citizens traveling in that direction.

In the absence of instructions in regard to my duties as Superintendent of Indian Affairs I can only say to you, and to your command that it is my wish and intention, so far as I am able, to maintain amicable relations with the Indian tribes who inhabit this country and while I will promptly protect the lives and property of the white inhabitants. I shall at the same time be equally ready and prompt in protecting the Indians in all the rights guaranteed to them by the Laws of America and from being forcibly ejected from their possessory rights in the Territory, until the Government of the United States shall have by treaty extinguished those rights. You will therefore carefully restrain your men from committing any act towards the Indians which would have a tendency to prejudice them against the white citizens.

Your duty to your country as well as your duty as an officer require a strict observance of this order. If by any cause the Indians of Oregon should the present year be aroused to hostilities the injury they might do to the settlements in the absence of a greater part of the male population would be incalculable

For the purpose of enabling you to act efficiently you will cause your Company to be well drilled and instructed in their duties, and to maintain good order and discipline, and hold yourself and Company in readiness to act as may be required by the Executive

The Arms of the United States to wit - fifty muskets and ammunition for which you have this day receipted have been furnished you. May they never in your hands be dishonored by either cruelty or cowardice.

Joseph Lane

Begin

Fellow Citizens of the Council and of the House of Representatives.

It affords me pleasure, to tender to you my friendly greeting, on the occasion of your assembling at the seat of Government for the first time under the law of Congress; "To establish the Territorial Government of Oregon" to enter upon the discharge of the important duties to which you have been called by the voice of your constituents.

The task devolves on me, to propose such measures, as have in the discharge of my official duties, suggested themselves as necessary to promote the interest and welfare of the Territory. In communicating with you, for the first time; it is a source of unfeigned satisfaction, calling for mutual gratulations and devout thanks, to a benign Providence, that we are in the enjoyment of general good health, and prosperity, and that we are at peace with the numerous tribes of Indians surrounding us. —

Widely separated and exposed as are our people, by reason of the great extent of country over which they are scattered, peace and harmony with the natives is of vital importance, to the security and success of our settlements. — The well being of the inhabitants of Oregon, no less than the cause of humanity, requires that we should always encourage relations of the most friendly character with our red brethren. —

The Cayuse nation remain unpunished, for the Massacre at Waiilatpu, but the whole tribe

will

will be held responsible until those whoever they may be concerned in that Melancholy and horrible affair are given up for punishment.— A fine Regiment of troops commanded by Officers who have distinguished themselves in the service of their Country are en route for Oregon and may be expected to arrive by the Middle of September.— It will then be in the power of the government to make this tribe accountable for their wrong-doing and I can assure you that our Government will not suffer the guilty to go unchastised.

A party of the Shey-whamish and Snoqualimich tribes recently made an attack on the Hudsons Bay Company's Fort at Nesqually in which difficulty an American Citizen was unfortunately killed; I shall hold these tribes accountable until the guilty shall have been punished.— It is the intention of the Gallant Officer, in command of the forces now in Oregon to establish a garrison of one company on Puget's Sound for the protection of the Settlements in that quarter, so that no apprehension of any further outrage in that Section need be entertained.—

I had the gratification while on a visit to the Dalles of the Columbia, to bring about a peace, at the request of the Chief of the Yackamans, between that tribe and the Walla Wallas, who were at that time engaged in war. These tribes, as also the tribes that I visited on the Cowlitz and Puget's Sound, I was pleased to find were friendly and well disposed towards us, and as well as the tribes bordering the settlements on the Willamette and Columbia, anxious to live

their professory rights to the soil. —
Surrounded as many of the tribes and bands now are, by the whites, — whose arts of civilization by destroying the resources of the Indians doom them to poverty want and crime, — the extinguishment of their title by purchase, and the locating them in a district removed from the settlements, is a measure of the most vital importance to them. —
Indeed the cause of humanity calls loudly for their removal from causes and influences so fatal to their existence. — This measure, is one of equal interest to our own people. — I would therefore call your attention to the propriety of Memorializing Congress upon this interesting subject.
We can recognize in Oregon, the material of her future greatness. — A climate and soil extraordinarily productive, eminently characterize it. —
The prolific growth of grain, vegetables and grasses, the natural meadows, untouched by the hand of cultivation, sufficiently extensive to furnish subsistance to innumerable herds of battle, during the entire year, inexhaustible forests of the finest fir and Cedar in the world; — never failing streams which furnish water power of unlimited capacity show how lavishly nature has bestowed her blessings upon this favored land. —
With the proper development of her agricultural resources, and the improvement of her immense water power, she can supply the entire Pacific coast, with the most important of the necessaries of life, and many of the staple

Staple articles of Commerce; — Her immense resources, are gradually but surely being developed; Her Mineral wealth at present is not to be computed, Gold has been found in several places, in sufficient quantity to induce the belief that there are Mines, perhaps extensive ones, of this precious metal, within the borders of our Territory; iron, lead and coal are known to exist, and the indications of their abundance, are of the most flattering description.

The Columbia is the only great river, on the Pacific Slope of our Continent, which leads from the Ocean to the Rocky mountains, by which a line of communication, can be opened to the great Valley of the Mississippi, — The navigation from its mouth to the Cascades, a distance of nearly one hundred & fifty miles, is uninterrupted for vessels of the largest class, — These obstructions and those beyond, may be surmounted in a considerable degree, by Canals and locks. —

The importance of this, immense line of interior communication, cannot fail ultimately to secure for it the fostering hand of the General Government. —

It is a source of great gratification, to know that the entrance of the mouth of the Columbia is much less dangerous, than has ~~been~~ heretofore been generally supposed, many Vessels, some of them large Ships, drawing from twelve to sixteen feet of water, have during the present year, crossed the bar, arriving and departing without the aid of pilots, light-houses or buoys, and not a single accident has occurred, ~~to interrupt~~

the

the facility of navigation during the present year.—

It affords me much pleasure, to give the subjoined extract of a letter, from Capt. Wood, of the United States Steamer, Massachusetts, as such testimonials, will have a tendency to disabuse the public mind, and remove the prejudices, unfortunately existing against the mouth of this Noble River.—

"Having waited until about 4 P. M. and seeing no indications that our signals for a pilot, had been observed, I stood in, following the directions I obtained in New-York, of Capt. M. Gelston, who was here last year in the Bark Whitton, proceeding safely and without accident to anchorage in Baker's Bay.— There was no one on board the Ship, who had ever been here before,— From, what I saw, it seems to me, that if the channel was properly buoyed, and there was a competent pilot ~~stationed~~ at the Cape, to conduct vessels in, that the entrance of the river would lose its horrors,— and in ordinary circumstances, be considered safe an easily accessible,—"

Congress has made an appropriation, for the erection of light houses at Cape Disappointment and Point Dungeness, and for the construction of buoys, to indicate the channels at the mouth of the Columbia, and the approaches to Astoria.—

This appropriation, it is to be feared, will be inadequate, in consequence of the high price of labor, occasioned by our proximity

proximity to the gold mines of California.—
I would, therefore, respectfully advise you, to memorialize Congress on the subject, acquainting them with all the circumstances and facts of the case, and shewing that the early completion of these contemplated improvements, are of vital interest to the Territory.

Puget's Sound is known to be one of the safest and best harbors in the world, It affords fine Ship Navigation into a beautiful and important portion of our Country.—

I refrain from dwelling further upon topics so interesting, as the features and resources of the Country, conscious as I am, that my feeble attempt to delineate them, is entirely inadequate to do them justice.—

I am happy to know that many of our people, who have been to the mines, are returning to their homes and farms and it is to be hoped, are satisfied and determined to remain, and renew their farming and other occupations.— the gold excitement occasioned the absence of a large part of our laboring population, many of them had failed to put in crops, fine farms are lying idle consequently the crop this year will fall short of an average one;— But there is no doubt, that with the grain on hand there will be a sufficient supply for home consumption;—

We have good reason to believe, that the extraordinary emigration to California, in consequence of the gold mines, will in a short time, result in adding so largely to our number,

that

that our population, now only about nine thousand, will be doubled in the next twelve months. — The healthy climate, rich and beautiful Valleys of Oregon, will doubtless induce many of them to seek a permanent home amongst us, — She will thus be benefitted by these Mines equally with her Sister Territory, —

It is estimated that upwards of two Millions of dollars in gold dust have been brought into Oregon, Since their discovery, this new element of prosperity, invested in agriculture and other branches of industry, must have a most cheering effect upon the prosperity of this Country. — It should however always be borne in mind, that the wealth of a country does not consist so much in dollars and cents as in the number, virtue, intelligence and patriotism of her population, in cultivated fields, flocks, and herds, and those facilities natural and artificial which afford an easy and certain market for its surplus production. —

From the best information I have been able to gather, from estimates and otherwise, the expence of the late Cayuse war, may be set down at about One ~~thousand~~ hundred and ninety thousand dollars, —

This indebtedness, has borne heavily on many individuals, who advanced Money to the Provisional Government, Some of whom, borrowed money, for the purpose of arming and subsisting the troops, and have since paid those sums, out of their own funds, by which they have

been

been greatly injured in their private affairs;—

The Justice of the war, and the good conduct of the Citizens, in promptly turning out in defence, of their County, entitle them not only to the good opinion of Government, but to an appropriation, by Congress sufficient to pay the expence of the war,—

It is for you to take such steps, as in your wisdom may seem best, to ascertain the exact amount of the expences of the war, and to whom it is due, and to lay the subject before Congress, with a request, that they make the just and proper appropriation;—

In regard to donations of land, the people of Oregon have long been kept in suspence. They believe that the faith of the Government is virtually pledged to a grant of land to each Settler, who has made a location and improved it.— The immediate attention of Congress should be called to the subject, and their early and favorable action requested,—

The necessity of good roads, in aiding the settlement, as well as in promoting the present and future prosperity of the County is too manifest to require illustration,— The enactment of laws to this end, and for the making such other improvements, as may facilitate intercourse, between the different Sections of the County as far as it may be within the ability of the Territory, is earnestly recommended,—

A good road, leading from Walla Walla to Puget's sound; one from Chehalis to some point on the Columbia, and another from the Dalles of the Columbia, to the Valley of the Willamette, are

the greatest importance to our Country in a Mil-
itary point of view, and will doubtless be so consid-
ered by our Government, if their attention, in a prop-
er manner, is called to the subject, —

A matter of the deepest interest to the prosperity
of the Territory, will be the establishment, of a judicious
system, to raise revenue, — This is no less demanded
for the redemption of the plighted faith of the Provision-
al Government, than it is for raising by a practicable
and legal method sufficient funds, not obtainable
from the federal treasury, to meet incidental and
necessary expences of the Territory, — While the home
Government contributes in a Liberal Spirit to the
maintenance of our temporary existence as a Territory,
it is expected, that all revenue, necessary to the local
interests of the several Counties will be supplied by
a system of equal assessments, levied upon the people
who are to be permanently benefitted thereby, —
Your early attention to this delicate but necessary
duty is earnestly recommended, —

Your immediate attention, is most
respectfully urged, to the examination and remedy
of the loose and defective condition of the Statute
Laws, declared by the Organic act to be operative
in the Territory, — No others prevail here, except
such, as were the offspring of the late provisional
Government, which are ~~[illegible]~~ compelled with an old
and imperfect edition, of the Laws of Iowa, which
were adopted by it, only one or two copies of which
are to be found in the Territory, — Most of these
Laws are unsuited to our present condition, —

Besides, they are to a great extent utterly be-
yond the reach of the body of the people, whose
lives

lives and property are to be contested by authority and rules for their guidance, not to be obtained, or if found not adapted to the new order of things, —

Certainty, simplicity and brevity in the statute regulations of any people, united to education and the general diffusion of the laws, constitute the most reliable safeguard against the commission of crime and the surest pledge of general prosperity. —

No duty is more arduous or more imperatively demanded by the public interests than that which devolves upon you in furnishing the people of the Territory with good & wholesome laws, — The public good as well as a just pride in your legislative reputation call for the application of your best energies and most careful deliberation, to this difficult and laborious task.

I feel it no less my duty than my highest privilege to call your attention to the deeply interesting subject of education, —

The bill of Congress provides that when the lands in the Territory shall be surveyed under the direction of the Government of the United States preparatory to to bringing them into market — Sections, numbered sixteen and thirty six in each township shall be reserved for the purpose of being applied to Schools

The munificent spirit displayed by Congress in making so liberal a grant for this purpose is a ground for grateful

acknowledgement, and indicates an enlightened policy, which looks to the general diffusion of knowledge, as the surest guarantee for the continuance of good government and the substantial happiness of our people.—

In this grant we shall have the means of promoting a system of Common Schools for the education and providing of all the children of the Territory.—

Your attention is invited to the importance of adopting a system of Common Schools and providing the means of putting them in immediate operation; and when the lands become available, the system, may under wise legislation, be maintained and continued without, bearing onerously upon the people, and ultimately, be productive of the end in view when the gift was made.

With a system of general education, sustained by such resources, there is no reason to doubt, that in the course of a few years, the rising generation, of Oregon, will proudly vie in respect to useful knowledge, and moral culture with that of the older settled portions of our Common Country.—

The organization of the Militia is a measure so, identified with the peace, security, and defence, of our people, that it cannot fail to recommend itself to your early consideration,— Your attention is invited to the act entitled "an act, to prevent the introduction, of fire arms amongst the Indians" This law not only prevents the introduction

of

of fire arms, but prohibits the sale of powder and ball, to the Indian, thereby depriving him in a great measure of the means of procuring subsistence, and if strictly enforced, would produce much suffering amongst this unfortunate race of people; humanity requires that we should afford them every facility that we can safely do, to ameliorate their condition. — It is well known that the tribes bordering the settlements are friendly and well disposed towards us, and that there is no danger to be apprehended from them, by placing in their hands, the means of procuring subsistence by the chase I would therefore recommend the repeal, of the law or its modification so as to discriminate, between friends and enemies, —

It will be your duty by enactment to fix the time, place and manner of holding and conducting elections, — To provide for the apportioning, the representation in the several Counties and districts to the Council and house of Representatives, to define the qualifications of voters and of holding office, and also to fix the day for the commencement of the regular Sessions of the legislative assembly.

It will be for you in your wisdom, to determine whether you will proceed to locate the seat of Government at the present or some subsequent Session of the legislative Assembly

In closing this communication, it only remains for me to assure you of my earnest wish for the adoption of such measures

as

as will tend to the general welfare, prosperity and happiness of our people.

Oregon City July 16th 1849.
